

Sampling made simple

TWIN-WIRE BIOPSY FORCEPS

Biopsy forceps are the gold standard for tissue collection during endoscopic procedures, providing the accuracy, reliability, and consistency clinicians need. Micro-Tech's Twin-Wire Biopsy Forceps portfolio offers a comprehensive range of sizes to suit various procedural needs. Engineered with precision-stamped, twin-wire technology, these forceps deliver firm, consistent jaw closure, helping to achieve a reliable bite with every use.

KEY BENEFITS

TWIN-WIRE DESIGN

Our twin-wire mechanism is designed to support radial jaw rotation and firm closure, helping clinicians achieve accurate and consistent specimen collection, even in anatomically challenging cases.

ERGONOMIC HANDLE

Designed with clinician comfort in mind, our short-throw, cushioned three-ring handles was designed to improve grip helping to control, and minimize fatigue during high-volume procedures.

WIDE RANGE OF JAW STYLES

Whether you need standard, large, or jumbo capacity, with or without needles, our diverse lineup helps support optimal sampling based on lesion size, tissue type, and procedural goals.
