SUREFIRE™
MULTIPLE BAND LIGATOR

SIMPLE SETUP. CONFIDENT DEPLOYMENT.

Band ligation setup shouldn't be complicated. It should be intuitive, dependable and ready to use - without extra steps.

The SureFire™ Multiple Band Ligator is designed to simplify setup with its preloaded, over-the-scope design that reduces setup steps while keeping the working channel free. Audible and tactile feedback, paired with clear band numbering, provide added confidence during deployment and support a reliable, streamlined banding process.

READY WHEN YOU NEED IT

CLEAR VISUALIZATION

DEPLOYMENT YOU CAN HEAR AND FEEL

KEY FEATURES

PRELOADED, OVER-THE-SCOPE DESIGN
Simplifies setup while keeping the working channel free to support a more efficient workflow.

CLEAR VISUAL FIELD
Designed to maintain a clear procedural view during band deployment, without obstructing the primary viewing area.

AUDIBLE & TACTILE FEEDBACK
Provides audible and tactile confirmation, allowing you to hear and feel each band release.

BAND NUMBERING INDICATION
Clear numbering on the handle helps track each band in use, supporting confident, sequential deployment.
